

Project Design Phase Proposed Solution Template

Date	15 February 2025
Team ID	LTVIP2025TMID54870
Project Name	DocSpot: Seamless Appointment Booking for Health
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	In today's fast-paced world, patients face difficulties in accessing doctors easily due to lack of real-time appointment systems, long waiting times, unorganized booking channels, and missing reminders. There is no centralized solution that connects patients with verified doctors efficiently.
2.	Idea / Solution description	DocSpot is a web-based and mobile-friendly application that provides a seamless interface for patients to search, filter, and book appointments with available doctors in real-time. It integrates secure login, instant notifications, appointment history, reminders, and doctor verification – all in one platform.
3.	Novelty / Uniqueness	Unlike existing appointment tools that are hospital-specific or difficult to navigate, DocSpot offers: ✓ Real-time availability ✓ Secure login with JWT ✓ Feedback loop ✓ Centralized dashboard for patients & doctors ✓ Built-in analytics and history tracking ✓ Easy scalability for rural clinics
4.	Social Impact / Custom	DocSpot reduces patient waiting times, ensures better time management for doctors, and improves healthcare accessibility. It builds trust with verified doctors and enables consistent

	er Satisfact ion	communication and digital records. This improves healthcare delivery, especially in urban and semi-urban areas.
5	Busines s Model (Revenu e Model)	- Freemium model for patients - Subscription plans for doctors and clinics - Commission on each appointment (optional) - Featured doctor listing for visibility - Analytics add-ons for hospitals and clinics
6	Scalabili ty of the Solution	The system is scalable to include: ✓ Teleconsultations (video call support) ✓ Diagnostic lab appointment integrations ✓ Pharmacy order support ✓ Regional language support for rural deployment ✓ AI-driven appointment recommendations ✓ Healthcare analytics dashboards
