**Problem – Solution Fit Template:**

| Section                                       | Details                                                                                                                                                                                                                                                          |
|-----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Target Group (Customers)</b>            | Patients seeking timely and convenient access to doctors; busy professionals; urban families; healthcare providers.                                                                                                                                              |
| <b>2. Problem(s)</b>                          | <ul style="list-style-type: none"> <li>- Difficulty in booking timely appointments</li> <li>- Long waiting times</li> <li>- Lack of appointment reminders</li> <li>- Inaccessibility of doctor availability</li> <li>- No centralized digital records</li> </ul> |
| <b>3. Existing Solutions (if any)</b>         | <ul style="list-style-type: none"> <li>- Phone call bookings</li> <li>- Hospital-specific apps (limited access)</li> <li>- Walk-in registrations (time-consuming)</li> <li>- 3rd party health platforms (expensive or complex)</li> </ul>                        |
| <b>4. Limitations of Current Solutions</b>    | <ul style="list-style-type: none"> <li>- Not user-friendly</li> <li>- Not real-time</li> <li>- Inaccessible to all age groups</li> <li>- Scattered data</li> <li>- No integrated feedback system</li> </ul>                                                      |
| <b>5. Our Solution</b>                        | DocSpot – A centralized, user-friendly, mobile-first platform for seamless doctor appointment booking with real-time availability, reminders, digital records, and feedback system.                                                                              |
| <b>6. How Our Solution Solves the Problem</b> | <ul style="list-style-type: none"> <li>✓ Real-time doctor availability</li> <li>✓ Fast appointment booking/cancellation</li> <li>✓ Smart reminders</li> <li>✓ Easy-to-use interface</li> <li>✓ Access to feedback and records</li> </ul>                         |
| <b>7. Key Customer</b>                        | <ul style="list-style-type: none"> <li>- Users search for instant access</li> <li>- Trust in verified platforms</li> </ul>                                                                                                                                       |

|                                       |                                                                                                                                                                                                                                 |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Behavior Patterns</b>              | <ul style="list-style-type: none"> <li>- Prefer mobile over desktop</li> <li>- Need for time efficiency</li> <li>- Likely to avoid apps with complex flows</li> </ul>                                                           |
| <b>8. Channels to Reach Customers</b> | <ul style="list-style-type: none"> <li>- Google search (SEO)</li> <li>- Social media ads</li> <li>- College/community health drives</li> <li>- Clinics &amp; hospital partnerships</li> <li>- WhatsApp health groups</li> </ul> |
| <b>9. Key Metrics for Validation</b>  | <ul style="list-style-type: none"> <li>- Appointment booking count</li> <li>- Daily active users (DAU)</li> <li>- Feedback score</li> <li>- Repeat user %</li> <li>- Time saved per user</li> </ul>                             |
| <b>10. Risks &amp; Assumptions</b>    | <ul style="list-style-type: none"> <li>- Doctors' participation may vary</li> <li>- Internet access assumed</li> <li>- Users are tech-comfortable</li> <li>- Privacy/data security concerns must be addressed</li> </ul>        |

### Purpose of This Fit Canvas

- Identifies key user pain points
- Validates whether **DocSpot** effectively addresses real issues
- Aids in aligning the **UX/UI, marketing, and product features**
- Sets a strong foundation for customer acquisition and retention
