Project Name	DocSpot: Seamless Appointment Booking for Health
Maximum Marks	4 Marks

User Persona

Name: Ravi Kumar

Age: 32

Occupation: IT Professional

Location: Hyderabad

Context: Frequently needs medical appointments but finds current systems frustrating.

Empathy Map Sections

THINKS

- “Why can’t booking a doctor be as easy as ordering food?”
- “Will the doctor be available when I reach?”
- “How do I trust online booking systems?”
- “What if the doctor cancels at the last minute?”

SAYS

- “I don’t have time to wait in hospitals.”
- “Calling clinics is a hassle; they don’t answer.”
- “I wish I could just see available slots online.”
- “There should be reminders and prescription uploads.”

SEES

- Long queues at clinics
- Outdated appointment registers or paper forms
- Some private hospitals with basic online forms
- Mixed reviews of telemedicine apps

HEARS

- Friends saying “I had to wait for hours to see the doctor.”
- Ads for apps like Practo, but complaining about app bugs or hidden charges
- Family urging him to go for regular check-ups but no time

FEELS

- Frustrated due to time wastage
- Anxious about getting timely care
- Distrustful of digital healthcare services
- Hopeful when a system works well

DOES

- Delays appointments due to scheduling issues
- Tries searching clinics manually on Google
- Occasionally uses telemedicine apps but finds them unreliable
- Uses WhatsApp to confirm appointments with known clinics

Summary:

Ravi needs a **reliable, fast, and easy-to-use platform** to book doctor appointments without calling or visiting in person. He values **trust, real-time availability, and reminders**, and is willing to try a digital solution if it's dependable.
