Project Name	docspot: seamless appointment booking for health
Maximum Marks	4 Marks

 Step 1: Team Gathering, Collaboration & Problem Statement Selection

Member Name	Role in Team	Contribution in Discussion
Pallem Tejaswi	Team Leader	Facilitated discussion, defined goal, selected idea
P Vyshnavi	Team Member	Contributed features like feedback, UI suggestions
P Sasi Kiran	Team Member	Shared backend insights, proposed secure login
P Sravani	Team Member	Provided user experience inputs, suggested filters

 Problem Statement Chosen:

"Creating a secure and real-time doctor appointment booking platform to improve access to healthcare and reduce waiting time for patients."

 Step 2: Brainstorming Session (Divergent Thinking)

Idea No.	Idea Description	Contributor	Tools/Tech Involved
1	Real-time doctor availability	Tejaswi	React, MongoDB
2	Upload prescriptions	Sasi Kiran	Multer, MongoDB
3	Email/SMS appointment alerts	Vyshnavi	Nodemailer, Twilio
4	Doctor rating & feedback system	Sravani	React, MongoDB

5	Doctor approval by admin	Tejaswi	Express.js, JWT, AntD
---	--------------------------	---------	-----------------------

Step 3: Idea Prioritization (Convergent Thinking)

Criteria:

- Feasibility (F)
- Impact (I)
- Innovation (N)
- Time/Cost Efficiency (T)

Idea No.	Idea Description	F	I	N	T	Total Score (Out of 20)	Priority Level
1	Real-time availability	5	4	4	4	17	High
2	Upload prescriptions	4	4	3	4	15	High
3	SMS/email notifications	4	4	2	4	14	Medium
4	Rating & feedback	3	4	3	4	14	Medium
5	Admin doctor approval	5	3	3	4	15	High

☒ Final Selected Ideas for MVP (Minimum Viable Product)
