

Agile Sprint Breakdown

Key Terms

- **Sprint:** A fixed period during which specific work is completed and made ready for review.
- **Epic:** A large body of work that can be broken down into multiple user stories.
- **Story:** A single unit of work (task) under an Epic.
- **Story Point:** A unit of measure for expressing the effort required to complete a story (commonly using the Fibonacci sequence: 1, 2, 3, 5...).

Sprint 1

Epic 1: Data Collection

- USN1 – Gathering Data → **2 Story Points**
- USN2 – Loading Data → **1 Story Point**

Epic 2: Data Preparation

- USN3 – Handling Missing Values → **3 Story Points**
- USN4 – Creating Fields → **3 Story Points**
- USN5 – Handling Inconsistency → **3 Story Points**

 **Total Story Points in Sprint 1: 12**

Sprint 2

Epic 3: Data Visualization

- USN6 – Bar Chart → **2 Story Points**
- USN7 – Pie Chart → **2 Story Points**
- USN8 – Line Chart → **2 Story Points**
- USN9 – Map → **4 Story Points**

Epic 4: Dashboard

- USN10 – Developing Dashboard → **5 Story Points**

Epic 5: Story

- USN11 – Developing Story → **5 Story Points**

✓ **Total Story Points in Sprint 2: 20**

Velocity Calculation

- **Total Story Points Completed:** 12 (Sprint 1) + 20 (Sprint 2) = **32**
- **Number of Sprints:** 2
- **Velocity = Total Story Points / Number of Sprints**
 - ➔ **Velocity = 32 / 2 = 16**

✓ **Team Velocity = 16 Story Points per Sprint**
